## Uni-Andes aims in the park

### **General**

We want to increase research activities and help in the conservation of local diversity

- •We are gathering species lists (mostly plants and mammals)
- •We are setting vegetation plots to monitor plants and camera-traps to assess the influence of disturbance on wildlife in the long term
- •We want to collaborate with other researchers and park staff in order to undertake research, enhance skills and promote sustainable development.

## Visitor's house
